Middle School Students Discover *What's So Cool About Manufacturing*

BEAVER, March 28, 2019 -- Catalyst Connection, which has been helping regional manufacturers grow their businesses for over 30 years, celebrated the *What's So Cool About Manufacturing Video Contest* at its annual recognition ceremony Thursday night. The program also included speakers discussing the future of manufacturing related to Industry 4.0 and getting students out of the classroom and into the manufacturing field. The event, held at the Community College of Beaver County's campus, attracted 300 people, including manufacturers, industry leaders, students, teachers and parents. The video contest is sponsored by the Chevron Corporation and Benedum Foundation.

"We are working to accelerate the pace of advanced manufacturing technology adoption, and build a world class advanced manufacturing workforce," said Petra Mitchell, Catalyst president and CEO. "Today's middle school students will be tomorrow's workforce in manufacturing. The latest technological advances, often identified as Industry 4.0, are creating a bright future and helping to position southwestern Pennsylvania as one of the top innovation regions in the world."

Regional partner, Beaver County Chamber of Commerce was instrumental in helping to pair 11 manufacturing companies with 9 middle schools for the videos. Student teams were encouraged to interview employees and go behind the scenes to learn about the manufacturing industry. The participants represented parts of Allegheny, Beaver, and Butler Counties. Each team submitted its video to Catalyst Connection. The contest yielded more than 69,000 votes over a five-day period. All of the videos can still be viewed at <https://www.whatssocool.org/previous-contests/pittsburgh-north/>

Companies who participated in the contest included: Acutran (Beaver), Adams Manufacturing (Butler), Butler Technologies (Butler), Keystone Ridge Designs (Butler), Nova Chemicals Corporation (Allegheny), Haemonetics Corporation (Allegheny), Mason Color Works (Ohio), McDanel Advanced Ceramics (Beaver), PittMoss LLC (Beaver), Q-Cast (Beaver), Veka (Beaver)

School Districts who participated in the contest included: Ambridge (Beaver), Beaver Falls (Beaver), Blackhawk (Beaver), Butler Area (Butler), Central Valley (Beaver), Hopewell (Beaver), New Brighton (Beaver), Rochester (Beaver), South Side (Beaver)

Award winners included:

Best Manufacturing Message
