Dear Summit Elementary Parents and Guardians,

I received an update from Gannett Fleming that none of the tests performed last week met the requirements for lead or copper levels. The flushing of the school water system continues and another round of testing will occur. I will meet with Gannett Fleming early next week. Hopefully, I will have a better understanding of where we stand so that I can convey that to you. In addition, I plan to be at the Summit Elementary PTO meeting next Wednesday night and will be happy to talk with you there.

Thanks,

Brian J. White, Jr. Ed.D
Superintendent
